Facilities Protection Systems
1150 Central Avenue, Suite D
Brea, CA 92821

Re: Pacific Palms Conference Resort
Balcony Railing and Guard Railing Refurbishment

To Whom It May Concern:

As a general contractor, our subcontractors are a true reflection of our success. We are always looking for trade specialists that represent quality, integrity, safety and service. Facilities Protection Systems has proven those qualities time and time again. The Vineyard Bank project in Corona, CA was a very high level and high profile finish tenant improvement project and the FPS team of Tom Garcia and Tom Ryan performed efficiently and professionally. They were always available, their crews were prepared, work was completed on time, and they were always willing to work around our customer's needs. I wanted to take this opportunity to thank your company for their outstanding service and I look forward to working with you again and again.

Sincerely,

Kelly Stevens, Project Manager
