To whom it may concern,

Subject: Facilities Protection Systems

I have been working with FPSI for approximately 15 years on various projects from small IT rooms to large corporate server rooms and facilities. They have, in my opinion been the best that I have seen in terms on knowledge, support, and follow-through. Whenever I need them they are always there. They have kept us up to date on the latest technologies for fire protection systems since I first met them.

I have the highest regard for their company based on all of the successful projects that we have completed together, and I would recommend them to anyone seeking high-end full service fire protection for specialized facilities.

Cordially,

A handwritten signature in black ink, appearing to read 'Paul Tziouvaras', is written over a horizontal line.

Paul Tziouvaras, Principal  
For: Mechanical Engineering Consultants, Inc.
